**HARRY DEXTER WHITE**☆, headed communist conspiracy in U. S. government, most important architect U. S. monetary system, reported communist agent by F.B.I. to Truman six times.

### CITIZENS DEMAND END OF INTEREST CHARGE AND RETURN TO CONGRESS CONTROL

New Interest-bearing Federal Reserve \$1.00 Notes Upset Applegart

Joint Resolutions are being introduced in 42 State Legislatures this month, others to follow, to demand that Congress take back ownership and regulation of all U. S. Currency as is spelled out in the Constitution. These actions are being introduced by representatives of Constitutional Government called Americans For America, P. O. Box 13238, Houston, Texas.

The Resolutions point out that the government does not own one share of stock in the Federal Reserve System and that the American people are now paying twelve and one quarter billions of dollars interest on the national debt every year to Wall Street International bankers.

The Resolutions also claim that this 4% interest charge applies to every dollar in every citizen's wallet and bank account. It cites Article I, Sec. 8, Para 5 of the Constitution which states—"Congress shall have the power to coin money, regulate the value thereof, and of foreign coin and fix the standards of weights and measures." It is claimed that Congress has no power to delegate this authority to any private Corporation and force the people to pay this exorbitant interest. It states further that the Federal Reserve pays no income tax; that there has never been a public audit of its books in the 51 years of its existence and being a private Corp., Federal Reserve employees cannot qualify for Civil Service.

The Federal Reserve Act became law on December 24th, 1913 under President Woodrow Wilson. He signed it the same night it

was passed. The sponsors of these Resolutions claim that the Federal Reserve was illegally and surreptitiously foisted on the American people when nearly all Congressmen had gone back home for Christmas.

According to authorities, once the money is taken away from International bankers and returned to the people, it will spell the end of government waste, Foreign Aid, Tax-free Foundations, World Court, Civil Rights, Communism and a thousand isms our government is forced to support at taxpayers expense.

### JOINT RESOLUTION TO BE INTRODUCED IN THE LEGISLATURES OF THE SEVERAL STATES

To require the United States Government to buy back the twelve Federal Reserve banks, as provided for in the Federal Reserve Act of December 23, 1913, restore and return to the Government of the United States the complete, absolute and unconditional ownership and regulation of our money from the hands of private Bankers, as is specifically spelled out in the Constitution of the United States.

1. WHEREAS, our Founding Fathers, realizing that any nation which does not issue and control its money is doomed to destruction, provided for this protection of the people by vesting in the Congress supreme control of currency by Article 1, Sec. 8, Para. 5 of the Constitution which states that Congress shall have power—"to coin money, regulate the value thereof and of foreign coin, and fix the standard of weights and measures," and

2. WHEREAS, on December 23rd, 1913, a privately owned Federal Reserve Corporation of International bankers, mostly foreigners,

was fraudulently unconstitutionally and surreptitiously foisted upon the American people by a small remnant of traitors or dupes in the Congress of the United States, after the great majority of loyal Congressmen had gone back home for Christmas and

3. WHEREAS, the Federal Reserve Corporation, in 1944, delegated control of our money to the International Monetary Fund, so today we find ourselves, through our fiscal system, under international control and,

4. WHEREAS, the Banker notes issued by the Federal Reserve have cost the American taxpayer (up to January 24th, 1964) Three Hundred and Ten Billion, Five Hundred and Seventeen Million dollars in interest by the use of Federal Reserve notes instead of United States certificates and

5. WHEREAS, President Abraham Lincoln, in 1864, saved the American people \$49 billions by refusing to pay private bankers exorbitant rates of interest on the \$400 millions necessary to finish the War, but instead decided to issue said amount in non-interest bearing currency and which rate of saving has been computed through December 31, 1962 at the rate of 5 per cent and of said issuance we find that \$346 millions are still in circulation, these Lincoln greenbacks representing the only money upon which our people have never paid one penny of interest, and

6. WHEREAS, Hon. Louis T. McFadden of Pennsylvania, for 10 years the Chairman of the House Banking and Currency Committee has accused the Federal Reserve, on the floor, "of looting the United States Treasury of more than Eighty Billions of Dollars in the year of 1928 alone and with similar thefts in the years following," and
